Projects supported by Corsica Ferries in 2026

Passenger contributions for 2025

Focus on the contributions in Indonesia

Participation in the Jaga Mangroves project in Indonesia

The Jaga Mangroves project – which translates to “Protect Mangroves” – focuses on **community-led restoration of mangroves in 8 regions across Indonesia**. Community awareness activities are designed to engage all community members and educate them on the value of mangrove ecosystems.

Since 2025, thanks to the passenger contributions starting from 2024, Corsica Ferries has been supporting this project, which aims to restore mangrove habitats in order to reestablish the vital services they provide.
